

FOR PROGRAMMERS

Programmers are sedentary workers.

It's important for them to have a comfortable chair, and a good keyboard.

Additional monitors will also do them favors, vertical monitor will make it easy to read codes.

FOR FILMMAKERS

Filmmakers need more real estate and larger storage.

Ultrawide monitor will help them better work in editing softwares.

A set of control pads help them navigate through editing softwares more efficiently.

FOR PROGRAMMERS

Ergonomic Chair

Chair with adjustable height, width, and angles. Made of soft materials, and curves suitable for human bodies.

Vertical Monitor

Buy a normal monitor, then flip it 90 degree. A vertical monitor provides coder with a wider view of the code. It's also good to have another horizontal monitor on the side, providing a full view of the code-preview.

Mechanical Keyboard

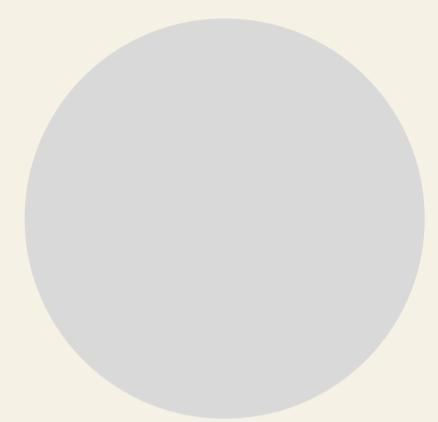

Unlike laptop keyboards, mechanical keyboards provides firmer and sharp clicks and reactions when typing. They give the programmer more control over their codes and the clicking sounds make them relaxed.

FOR FILMMAKERS

Ultrawide Monitor

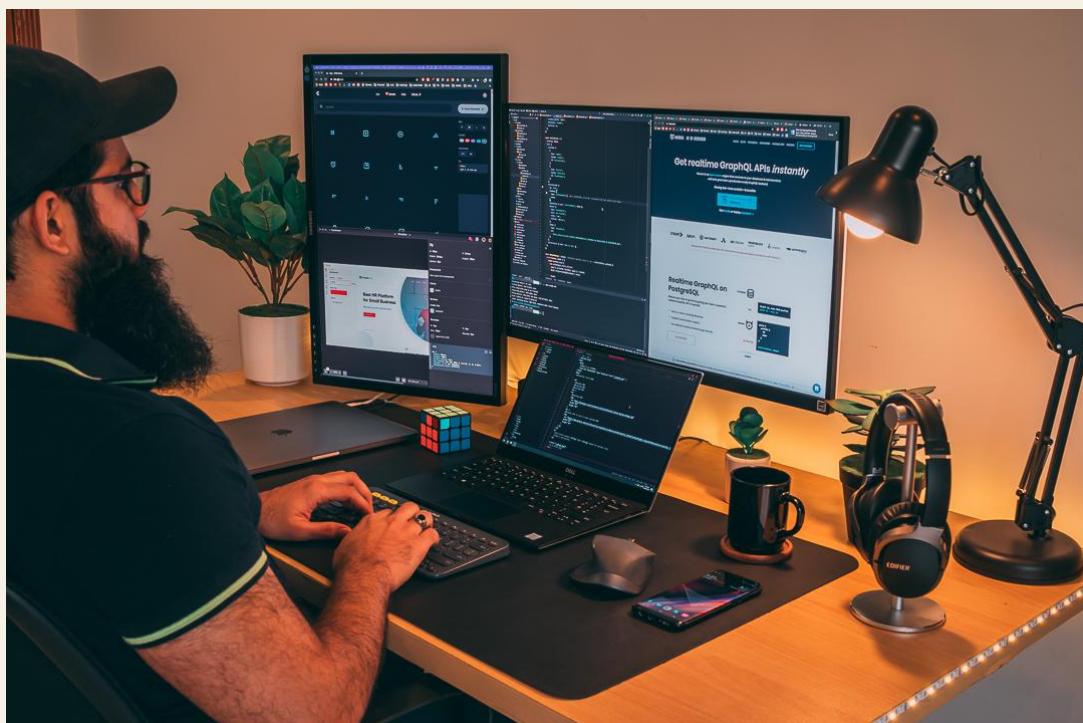

Ultrawide monitor provides additional horizontal space for editors to adjust video properties, while preserving un-cropped preview of the video.
